Website Issues & Required Changes

Brass Handicrafts Website – Bug Report for Web Developer

Summary

Four issues need to be fixed: (1) a product page showing "Page Not Found", (2) the enquiry form rejecting correct CAPTCHA answers, (3) the "Discover More" button on the home page doing nothing, and (4) product names not matching their images on the product listing page.

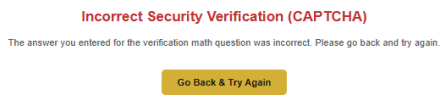

#	Issue	Location	Priority
1	Product page not found / no description	Royal Virgin Brass Champagne Bottle Cover	High
2	CAPTCHA always shows incorrect	Enquiry / contact form	High
3	"Discover More" button not working	Home page hero banner	Medium
4	Product names and images mismatched; layout broken	Product listing grid	High

1. Product Page: "Royal Virgin Brass Champagne Bottle Cover"

Problem: Opening this product shows a "Page Not Found" error. No description is available for the product.
Required fix:
• Check the product link/URL and make sure the page file or route exists.
• Add a complete product description (material, size, finish, use) and product images.
• Test every product link on the site for similar broken pages.

2. Enquiry Form: CAPTCHA Error

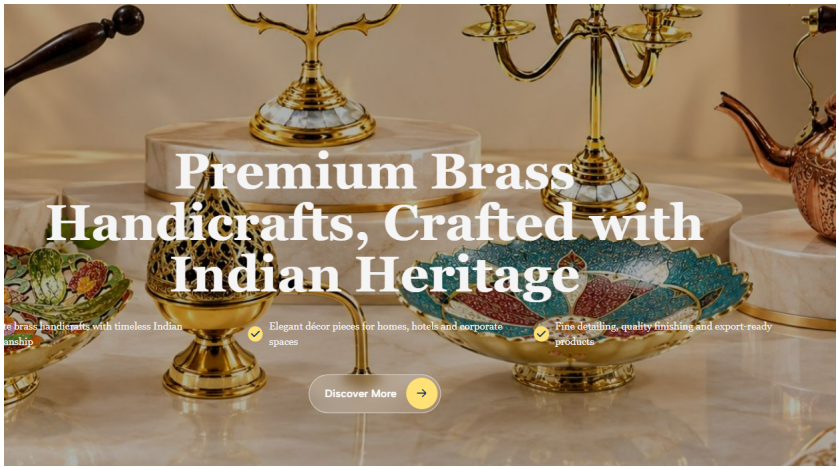

Problem: On submitting the enquiry form, the message "Incorrect Security Verification (CAPTCHA)" appears even when the correct answer is entered.
Required fix:
• Check the server-side validation of the math CAPTCHA. The stored answer (session) may not match the submitted value, or the session may be expiring or not starting.
• Make sure the answer is compared as a number (trim spaces, same data type).
• Check that the CAPTCHA is not regenerated on page reload/submit.
• Test on desktop and mobile, and confirm enquiries reach the email/database.

3. Home Page: "Discover More" Button

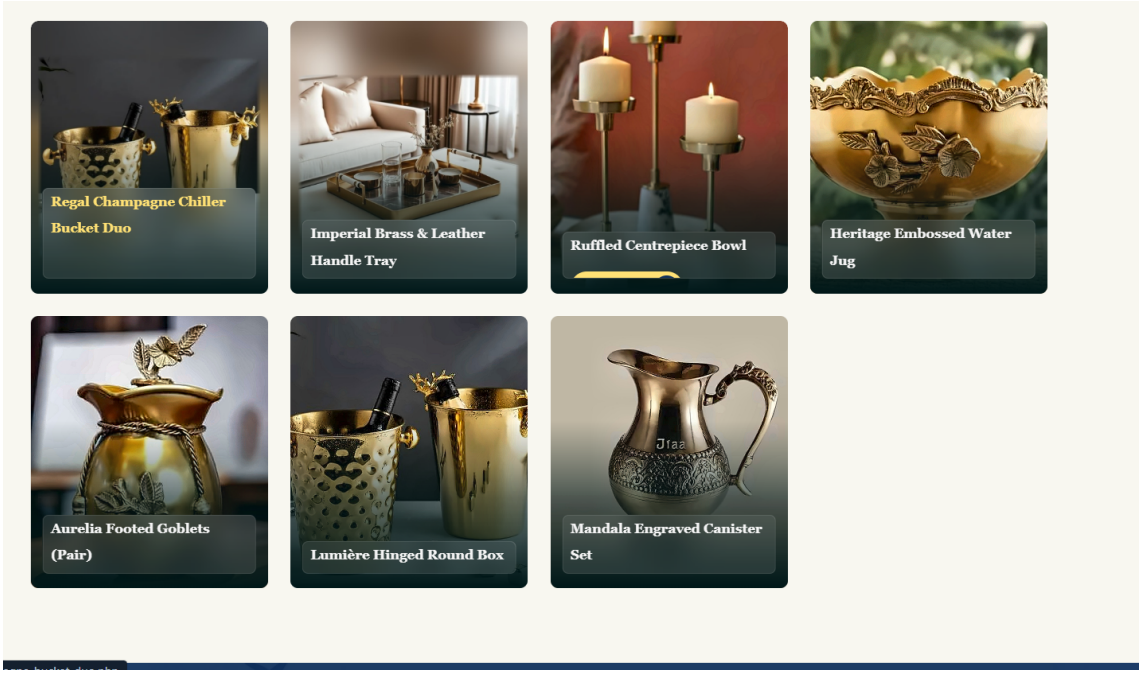

Problem: Clicking "Discover More" in the hero banner does nothing.
Required fix: Link the button to the correct page (e.g. Products / About page) or scroll to the products section, and check for JavaScript errors in the browser console.

Screenshot: Home page hero with "Discover More" button

4. Product Listing: Names and Images Mismatched

Problem: Several product names do not match the image shown, and some images are not placed or cropped properly (see screenshot below).

Screenshot: Product listing grid

Product name shown	Image currently shown
Regal Champagne Chiller Bucket Duo	Champagne bucket duo (correct)
Imperial Brass & Leather Handle Tray	Tray on table (correct)
Ruffled Centrepiece Bowl	**Wrong:** candle stands
Heritage Embossed Water Jug	**Wrong:** embossed bowl
Aurelia Footed Goblets (Pair)	**Wrong:** lidded pot with rope detail
Lumière Hinged Round Box	**Wrong:** champagne bucket duo (same image as card 1)
Mandala Engraved Canister Set	**Wrong:** water jug

Required fix:

• Match every product name with its correct image (the correct image for each name is the one that clearly shows that product; the images currently look shuffled).
• Use a unique image for each product (card 1 and card 6 use the same photo).
• Fix image cropping so the product is fully visible and centred, with consistent card sizes.
• The yellow button on the "Ruffled Centrepiece Bowl" card is cut off at the bottom; make the button fully visible or consistent across all cards.
• The first card title is yellow while the others are white; keep one consistent style.
• The title overlay covers part of the product photo; adjust it so the product stays visible.

After the fixes: please test all pages on desktop and mobile and share the updated website link for review.
